Phase

Luxxbox has created the phase pendant to embody contemporary imagery and patterns. The complex tri-form profile is interspersed with random angular shapes referencing microprocessor pathways. The random design creates a light filled space with varying shades and overlaid patterns. Phase comes in four sizes and three standard colours – it works great on its own as a decorative pendant or hung in clusters of three or more. Fantastic for large entry voids or used as a single piece over a dining table.

Available in a stock range or colours as well as custom colours and sizes for projects

*Custom colours available, minimum quantity or set up charges may apply

- _polyester coated, aluminium
- _custom colours available
