pHlask 1000

pHlask 2000

pHlask pendant

The pHlask lab-ware range literally makes 'light' of science. Reminiscent of days spent in the school lab, these pendants command a second look. Rather than functioning as a vessel for a chemical reaction, where the stopper acts to restrict the contents of the flask; the stoppers in these pHlasks allow light to radiate beyond the enclosed volume to fill any room.

Available in 3 sizes, the pendants can be suspended in clusters or as single units to create a lab-like feeling in any space.

Made from High Temp Borosilicate, German made lab glass.

key features

- _ suitable to indoor environments
- _ comes with 2 metres of power cable
- _ G9 Halogen lampholder
- _ 40 Watt max

How to specify
Product code:

- LX-PL500 = pHlask 500
- LX-PL1000 = pHlask 1000
- LX-PL2000 = pHlask 2000
